

# Broadband Feasibility Study

## Make Your Voice Heard!

Marion County has partnered with technology consultancy Televate to begin the Broadband Feasibility Study.

A part of this study is an in-depth eCheckup for households and businesses regarding your current internet service and how you feel about it. These questions will help us determine where new and improved internet services are needed most throughout Marion County!

Follow these QR codes for a link to each eCheckup. To provide the most accurate results, please take the survey on a hardwired device such as a PC, laptop, or tablet that is connected to your home or business network.

Household eCheckup    Business eCheckup
